Ricardo Castelló Román

Senior Full-Stack Engineer · TypeScript · React · Node.js · Solana
Alicante, Spain (Remote, open to travel) · ricardocr987@gmail.com
GitHub · LinkedIn · Telegram · riki.bio · brickstudio.es

Full-stack engineer shipping production trading and payments infrastructure since 2021, for clients including Jupiter, frnx.ai and Fishnet. Own delivery end to end, from Solana programs to backend APIs and production frontends.

Experience

Jupiter · Full-Stack Engineer *2026*

- Built a webhook-driven Telegram backend for prediction markets, copy trading, gasless transactions, Privy wallets, referrals, notifications and broadcasts, plus web pages and Telegram Mini Apps for onboarding.
- Co-built Jupiter's Telegram trading and prediction bots from launch to 14,000 users and $3.8M in transaction volume.

frnx.ai · Full-Stack Engineer *2025*

- Built the Solana transaction layer for portfolio swaps, staking, subscriptions, blinks and referrals, alongside the UI and UX supporting these flows. Demo
- Developed Delegate Vault, a Solana program and background execution service for portfolio liquidation triggered by stop-loss, take-profit and time-based conditions. Code
- Disclosed a critical Phantom Wallet transaction simulation vulnerability found while building the app. Demo

Fishnet · Full-Stack Engineer *2023*

- Built Solana Pay payment and monetization components with wallet connectivity and authentication. Code

Aleph.im · Backend Engineer *2022*

- Contributed open-source Solana indexers that turn on-chain transactions into queryable data for DeFi protocols. Code

Botborgs · Freelancer *2021*

- Reverse-engineered a closed-source staking contract to build an NFT airdrop distribution for holders. Code

Technical Skills

- **Languages:** TypeScript, JavaScript, Rust, Python, Go, SQL
- **Blockchain:** Solana, Anchor, Solana Kit, Token-2022, cNFTs, Solana Pay, Privy, Jupiter, Metaplex
- **Frontend:** React, Next.js, Astro, HTML, CSS, Tailwind, TanStack Query, Zustand, Redux Toolkit, shadcn/ui
- **Backend:** Node.js, Bun, Elysia, Hono, Zod, Kafka, REST APIs, WebSockets, GraphQL, Stripe
- **Data:** PostgreSQL, Redis, ClickHouse, Supabase, Firebase, Drizzle ORM, SQLite
- **Infrastructure:** Cloudflare Workers, Docker, Linux, AWS, GCP, Vercel, Grafana
- **Tools, CI & Testing:** Git, GitHub Actions, Turborepo, Vitest, Jest, Playwright, Sentry
- **AI:** Claude Code, Codex, OpenCode, MCP, LLM integrations, agent workflows

Independent Projects

Brick Studio · Web Agency *2026*

- Running a web agency that helps small business owners grow their online presence and productivity.
- Building AI-powered growth tools on Cloudflare Workers and self-hosted infrastructure, using AI agents with custom skills to speed up feature delivery and improve code quality.

Squads CLI · Technical Guide *2025*

- Published an in-depth guide to building Squads multisig tooling with Solana Kit. Code · Guide

Brick Protocol · On-chain Marketplace *2023*

- Built token-based access controls, compressed NFT invoices and monetization protocol. Code

Education & Languages

Double Degree in Computer Science and Business Management · University of Alicante *2024*
International exchange at the Technical University of Ingolstadt, Germany
Languages: Spanish (Native) · English (C1)

Achievements

- Winner at the Solana Berlin Build Station with Brick Protocol. Announcement
- Led a Solana development workshop for university students. Code · Slides
